

INSU

**Everyday Risk, Instantly
Covered**

That anticipated hike

You've waited all year to go
on that awesome hike
across the mountains

You planned ahead,
trained appropriately and
bought all the right gear

All your friends made it to
the trip

And then, the weather
worsens and you start
worrying

The Problem

Modern life is increasingly exposed to frequent, small but financially and emotionally painful disruptions:

- Power or water outages that shut down SMEs and home offices
- Event cancellations or extreme weather ruining once-in-a-lifetime moments
- Rain that kills a day's revenue for a café
- Urban disruptions that are real, visible, and underinsured

Traditional insurance is poorly suited to these risks:

- Slow claims processes
- High fixed costs
- Minimum coverage thresholds too high
- Poor user experience for small, frequent events

At the same time, millions of people already intuitively price these risks every day:

- “Will I have to cancel my long-awaited hike?”
- “Will the power go out today?”
- “Will it rain during my wedding?”

They just lack a simple, trusted way to transfer that risk.

The Solution

Insu is a parametric event-protection platform that allows individuals and small businesses to:

- Buy instant protection against specific real-life events
- Receive automatic payouts when objective triggers occur
- Access protection that feels simple, intuitive, and immediate

Behind the scenes, risk is:

- Pooled among users
- Offset by opposite-side participants (risk takers / yield seekers)
- Optionally reinsured or warehoused

Why Now

1. Consumers are used to real-time digital financial products
2. Data availability (weather, mobility, grid) is better than ever
3. Climate volatility is visible and personal
4. Regulatory innovation around parametric insurance is accelerating

At the same time, trust in traditional insurance is low, creating room for new formats.

How It Works

1. Users log into **Insu** to find about events in their area and if they are being covered,
2. **Insu** prices protection using:
 1. Historical data
 2. Forecasts
 3. Market demand
3. Capital from pooled participants backs the event
4. Trusted data sources monitor the trigger
5. Automatic payout within minutes if trigger occurs.

No claims. No disputes. No paperwork.

The screenshot displays the Insu website interface. At the top, there's a navigation bar with the Insu logo, a search bar, and links for 'How it works', 'Log In', and 'Sign Up'. Below the navigation bar, the website is divided into four main categories: Urban, Nature, Experiences, and Events. Each category contains several event cards. Each card lists a specific event, its trigger conditions, and the available coverage options (Premium and Basic) with their respective prices. For example, under 'Urban', there's a card for 'Power outage in CDMX of more than 2 hours?' with prices ranging from \$100 to \$500. Under 'Nature', there's a card for 'How many 7.0 or above earthquakes by June 30?' with prices ranging from \$400 to \$4,000. Under 'Experiences', there's a card for 'Less than 20 cm of snow in Whistler?' with prices ranging from \$1,800 to \$16,000. Under 'Events', there's a card for 'Bad Bunny concert cancelled?' with prices ranging from \$200 to \$4,000. At the bottom right, there's a button labeled 'Submit your own program' with a red plus icon. An arrow points from this button to the text below.

If the coverage they are looking for is not available, users can submit their requests to Insu for evaluation.

How It Works: Experience protection

Buyer Side (Hedger)

“Protect my beach vacation if it rains more than 3 days”

1. Pays \$25
2. Receives \$300 if trigger hits
3. Zero interest in tradability

The screenshot shows a user interface for a weather-based insurance product. At the top, there is a sun icon and the text "More than 10mm of rain in Acapulco for 3 days?". Below this, there are two pricing options: "Premium coverage" for \$800 / \$3,200 and "Basic coverage" for \$300 / \$1,800. A red dot indicates the end of the quarter (Q1) with a volume of \$2m. A "Buy now" button is visible at the bottom right.

Coverage Type	Price
Premium coverage	\$800 / \$3,200
Basic coverage	\$300 / \$1,800

● End Q1 \$2m Vol.

Buy now

Insu's Role

1. Defines standardized contracts
2. Sets pricing bands
3. Manages pools
4. Takes a fee
5. Handles payouts

No balance sheet risk. No speculative trading UI. No gambling narrative.

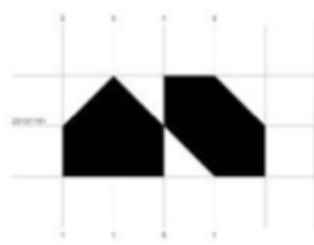

Seller Side (Risk Providers)

Capital pooled across:

1. Hundreds of vacations
2. Different locations
3. Different dates

Expected return driven by:

1. Probability × payout – fees

INSU

Not a bet and not traditional insurance, but peace of mind, priced transparently.
